ESMAD | TSIW | POO
Exercise Sheet nº 9
Arrays & Objects & Bootstrap

Make a Web page that models a "To Do" app in order to manage daily tasks.

The web app must support at least the following features:

- Add a task

- Assign a category to a task

- Filter the task by name and category

- Order by name

- Perform task (same as remove)

Some notes:
- Students are free to add new features as long they support the required ones;
- Students should use Bootstrap to format the UI.
